

# AvGas 100LL

# AvGas 100LL

This grade refers to the low lead version of AvGas 100 and has the same specifications, namely ASTM D 910 and UK DEF STAN 91-90.

AvGas 100LL is dyed blue.

## Geographical Network and Supply Security

- Our network of key storage and distribution facilities for industrial and petroleum chemical products have grown since 1984 in the Middle East and East Africa
- Assets strategically-located to facilitate product delivery and provide for efficient logistics
- Location across the Red Sea line provides for tremendous operational, product procurement and management synergies.

State of the Art Drumming Line for Aviation Gas along with Safety Systems

Solvochem FZCO Facilities in Jebel Ali Free Zone

Aviation Gasoline (AvGas) is commonly used for small-piston powered aircraft. It is also used in activities such as flight training, flying clubs and crop spraying.

## Air. Sea. Road.

**We've got you covered... the benefits of partnering with Solvochem include:**

- Ex stock availability for immediate delivery
- Reduced stock and storage conditions for customers
- Reduced working capital for customers versus importing from Europe or other destinations
- Product is packed in high quality drums of 1.0 ml, which is internally lined to meet the highest HSSE standards. There is a stringent drumming procedure for AvGas with various checklists
- A conformity letter can be supplied along with an inspection letter when required
- A system for traceability and retained samples of each batch delivered.

At Solvochem, we have the latest state-of-the-art facilities and safety systems to ensure safe handling of AvGas. Our professional staff are trained to handle operations, logistics and customer needs. We have extensive knowledge of all logistical requirements for local UAE or for export deliveries.
